

Introduction

The KMB team has completed site development and design services throughout the USA and Europe for various carriers. This portfolio is a small selection of some Design & Build work we've done for FLO TV.

Design & Build

Qualcomm – FLO TV – KMB is providing Design & Build services for this client throughout the USA. FLO TV is a Qualcomm company that provides independent live TV broadcast to your mobile device you can visit their website at www.flotv.com.

Installation of a Ku dish and associated ice shield. The Ku dishes receive the broadcast signal via satellite which is then broadcast through the UHF antenna.

FLO TV shelter on a reinforced concrete foundation with integrated back-up generator.

Installation of a FLO TV compact shelter. This shelter is fully integrated on a prefabricated reinforced concrete pad with the heat exchanger, transformer and generator already installed and wired ready for testing and commissioning.

Installation of a UHF antenna on a custom KMB designed tower extension mast.
